

## Chemical Industry SAP Users Group (CISUG) and Loftware Highlight Product Labeling Demands and Hazardous Communication Risks in the Chemical Industry

**September 8, 2011 Portsmouth, NH** – On September 14, 2011, CISUG –the CISUG Sustainability Working Group and Loftware, an SAP Partner and Certified Integration Provider, will host a webcast discussing current regulatory and evolving labeling standards as they relate to the highly regulated global chemical industry. Industry expert Michelle Baker, CHMM Product Stewardship Manager for **Zeon Chemicals LP**, will discuss labeling and hazardous communication risk.

The chemical industry, which already stands out as a sector with extraordinary risk management issues, is increasingly characterized by complex supplier/partner relationships and multi-layered supply chain models. From raw materials and manufacturing facility requirements to end-user delivery, every step of a chemical product's passage through the supply chain must be planned, known, and implemented without failure.

Key topics that will be discussed include the emergence of global data and labeling standards like OSHA, REACH and GHS and their impact on controlling the regulatory data from mission critical applications for hazardous communications; ensuring label creation meets regulatory standards and customer requirements; enabling label modifications to support evolving regulations without coding; and centralizing control of the SAP label printing function.

### About Loftware

*Loftware is the foremost authority and global market software leader in Enterprise Lifecycle Printing (ELP). ELP is a category of software that enables a holistic approach to barcode labeling, documents, and RFID Smart tags integrated into an enterprise's application infrastructure across the entire supply chain. Loftware's 'no programming required' approach leverages existing data processes to ensure a harmonization of product information from design to delivery. By eliminating redundant data sources, we deliver agile and compliant solutions that offer high-volume print capabilities for SAP, Oracle and legacy systems. In all, Loftware has enabled over 5,000 organizations to quickly develop and deploy complex label and document printing integration with unprecedented domain expertise. Learn more about Loftware by visiting <http://www.loftware.com>.*

As an SAP Partner and SAP Certified Integration provider, Loftware takes ERP system label printing to a new level, driving a seamless flow of supply chain and manufacturing operations and meeting process manufacturing demands that require flexibility and compliance.

### **About CISUG**

The Chemical Industry SAP User Group (CISUG) is a part of ASUG and open to all employees of SAP chemical industry customers. The group is constituted to influence SAP product development and provide a means for discussing issues of common interest and enabling communication within the community. Learn more about CISUG by visiting <http://www.asug.com/Home.aspx>
